

# Codebook Crimean Tatar Repression Dataset (CriTaRep)

Version v1. October 2025

Please always cite when using the data (check for new dataset versions).

## 1. Data Sources

The data used for the dataset were taken from multiple civil society organisations dealing with Crimean Tatar issues, including the *Crimean Tatar Resource Center*, *CrimeaSOS*, the *Crimean Human Rights Group*, and *Crimean Solidarity*.

Table 1: Crimean Human Rights Organizations

| Organization                  | Description                                                                                                                                                                                                                                                                                                                                                                       | Sources                                                                                                                                                      |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Crimean Human Rights Group    | A non-governmental organization composed of human rights defenders and journalists focused on promoting and safeguarding human rights in Crimea.<br><a href="https://crimeahrg.org/en/">https://crimeahrg.org/en/</a>                                                                                                                                                             | Monitoring reports in Russian and Ukrainian published on a monthly and quarterly basis, covering the period from August 2016 to December 2024.               |
| Crimean Solidarity            | Crimean Tatar informal initiative aimed at supporting and defending individuals subjected to repression on ethnic, religious, or political grounds in Russian-occupied Crimea.<br><a href="https://crimean-solidarity.org/">https://crimean-solidarity.org/</a><br><a href="https://facebook.com/crimeansolidarity">https://facebook.com/crimeansolidarity</a><br>YouTube channel | Textual and audiovisual materials in Russian and Crimean Tatar, covering the period from April 2016 to December 2024.                                        |
| Crimean Tatar Resource Centre | A non-governmental organization with the aim of protecting the collective rights of the Crimean Tatars as an Indigenous people, as well as the individual rights of all residents of Crimea, in pursuit of sustainable development.<br><a href="https://ctrcenter.org/en">https://ctrcenter.org/en</a>                                                                            | Monitoring reports in Russian and Ukrainian published on a monthly, quarterly, and annual basis, covering the period from January 2016 to December 2024.     |
| CrimeaSOS                     | A non-governmental organization focused on exposing the illegality of Crimea's occupation, documenting Russian repression, maintaining ties between Crimea and mainland Ukraine, and defending the rights of IDPs and others affected by the conflict.<br><a href="https://krymsos.com/en/">https://krymsos.com/en/</a>                                                           | Two volumes of "Encyclopaedia of repressions in Crimea since the annexation by Russia" in Ukrainian covering the period from February 2014 to December 2018. |

## 2. Codebook

*CriTaRep v1* comes in two forms: as an event dataset (includes only repression events): *repression\_event\_data.RData* and as a panel dataset (events/ variables per day): *repression\_panel\_data\_pd.RData*.

Table 2: Codebook Event Dataset

| <b>Variable</b>      | <b>Description</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| case_id              | Case id of repression event                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| year                 | Year of event                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| month                | Month of event (numerical)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| day                  | Day of event (numerical)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| event_date           | Day of event (e.g. "2014-02-21")                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| location             | Location of event (district-level)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| latitude             | Latitude coordinate of event in decimal degrees                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| longitude            | Longitude coordinate of event in decimal degrees                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| target_sub-group     | Targeted sub-group of Crimean Tatars (e.g. "Mejlis")                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| event_description    | Free-text description of the event. Text/String (unstructured)                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| repression_type1     | Primary type of repression (categorical): Arbitrary search; Arbitrary search with detention; Arbitrary search with arrest; Detention; Detention with arrest; Detention with interrogation; Arrest; Imprisonment; Interrogation; Administrative penalty; Administrative pressure; Criminal prosecution; Deportation; Entry ban; Extrajudicial killing; Extrajudicial violence; Forced disappearance; Torture; Interrogation with torture; Detention with torture; Detention with violence; Arbitrary search with violence. |
| repression_type2     | Secondary type of repression, if applicable (categorical). Same possible values as repression_type1. Used to capture additional forms of repression experienced, e.g. torture following arrest.                                                                                                                                                                                                                                                                                                                           |
| repression_type3     | Tertiary type of repression, if applicable (categorical). Same possible values as repression_type1. Used to capture additional forms of repression experienced.                                                                                                                                                                                                                                                                                                                                                           |
| repression_type_main | This variable describes the main type of repression.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| victim_categ         | Primary category of victim: Activist; Businessmen; Civilian; Cleric; Journalist; Lawyer; Politician.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| victim_categ_abbr    | This variable describes abbreviation for victim category: "act" for Activist; "bus" for Businessmen; "civ" for Civilian; "cler" for Cleric; "jou" for Journalist; "law" for Lawyer; "pol" for Politician.                                                                                                                                                                                                                                                                                                                 |
| number_victims       | This variable describes total number of repression victims per repression event.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| injured              | This variable describes total number of individuals injured by repression event.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| killed               | This variable describes total number of individuals killed by repression event.                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| injured_pessimist    | This variable describes higher-end estimate of individuals injured by repression event.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| killed_pessimist     | This variable describes higher-end estimate of individuals killed by repression event.                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| actor_name           | Primary names of actors conducted repression: Centre for countering extremism (Center "E"); Cossacks; Court; Customs; Federal Security Service (FSB); Law enforcement; Local authorities; Police; Self-defense; Special police units (OMON).                                                                                                                                                                                                                                                                              |

| cultural_event_name | Indicates the name of a Crimean Tatar holiday or commemoration on a specific day                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| cultural_event      | Binary variable whether there was a Crimean Tatar holiday or commemoration on a specific day                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| daily_sanctions     | The variable daily_sanctions captures the number of sanctions or extensions of existing sanctions that were announced on a specific day by either the European Union (EU) or the United States (US). It reflects only those measures that directly target Russian entities, including companies, government officials, politicians, and private individuals. Sanctions that are indirect in nature, such as those directed at third-party countries like Iran for providing material support to Russia, are excluded from this count. If both the EU and US announced coordinated or joint sanctions on the same day, each action is counted separately, meaning that joint actions are double-counted. The variable does not encode the content, scope, or severity of the sanctions. Coded based on secondary sources, see: sanctions_eu_usa.xlsx |
| weekly_sanctions    | Number of sanctions imposed during a specific week                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| monthly_sanctions   | Number of sanctions imposed in a specific month                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
